Dear Colleagues and friends

On behalf of the ESPU Educational Committee and the ICCS we have the great pleasure to invite you to this educational course in paediatric urology. This event will be a joint venture with the ICCS aiming at functional disorders of the urinary tract the first day which is of common interest for all involved specialties like paediatric urology, paediatricians, urotherapists, OR and ward nurses. The second day we will split so the surgeons can talk about the cool knife , the soft people digging into the voiding function, while the nurses will cover surgical processes and urotherapy. Fellows in paediatric urology have the opportunity to get through the spectrum of topics required for the FEAPU exam next year, don't miss it and keep updated. For those of you who are interested in laparoscopy, the XIV course 2½ days of laparoscopic urology and paediatric urology will be held in extension of this event with focus on complications in the animal lab at the same venue. See www.urologi.dk for further information.

The course will be held to coincide with the festivities of the annual Aarhus Festival Week, which encompasses a wide variety of cultural activities. Delegates can therefore look forward to enjoying the late-summer evenings of the city while in its prime. However, early registration is necessary due to the limited number of hotel rooms during the festival week.

Looking forward to seeing you in Aarhus.
