WELCOME NOTE

Dear Friends & Colleagues,

Welcome to the **8th Hypospadias International Congress**, due on October 7-10, 2026 in Athens, Greece.

We would like to welcome you, a Pediatric Surgeon, Pediatric Urologist, adult Urologist, Plastic Surgeon, Andrologist, Endocrinologist, Psychiatrist or a Basic Scientist to actively participate in this unique congress and meet the leading experts of our time. You will have the opportunity to exchange scientific information and technical know-how. The key-note lectures are carefully chosen to cover the whole spectrum. A major highlight is the live surgery on Saturday, October 10th that covers the whole surgical spectrum.

Hypospadias has become a true specialty. There is still a lot that is unknown and there is a need to promote research and to exchange and promote knowledge and experience.

There will be valuable **Basic Science** (5000 €) and **Clinical Research** (1000 €) prizes for the best scientific presentations.

The word Hypospadias is in fact Greek, introduced by Galen in the first century AD.

Greece is the cradle of European civilization and Athens is a vibrant international city with direct flight connections to all major cities of the world. In addition to the high quality scientific program, there will be an exciting social program that will enable you to experience and enjoy the Greek history and culture, the Greek traditions and the delicious Greek cuisine. The Hotel is carefully chosen in the Attica Riviera directly on the sea so that you can bring your family to enjoy the beautiful Mediterranean sea.

There will be a fabulous pre-congress and post-congress Tours to beautiful Greek islands.

Looking forward to welcoming you in Athens in October 2026,

On behalf of the organizing committee

Ahmed Hadidi
