# Word of Welcome

Dear Members and Delegates,

It is our pleasure to welcome you all to Yorkshire – “God’s own county” in the United Kingdom. The ESPU congress is being held in the UK for the first time in 20 years, the last occasion being in London in 1996.

The 2016 annual ESPU meeting will be held from 22–25<sup>th</sup> June 2016 at the Harrogate International Convention Centre (HIC). Harrogate is an elegant spa town in North Yorkshire, which is widely regarded as offering amongst the best quality of life in the UK, being voted the happiest town in the country in a recent national poll. Harrogate hosted the first day of the Tour de France in 2014. Harrogate is close to the scenic countryside of the Yorkshire Dales National Park as well as many historic sites and beautiful historic houses and gardens. The town’s motto is ‘arx celebris fontibus’ which translates as ‘a citadel famous for its springs’, the first spring having been discovered in 1571.

On the scientific front, we are confident that the program will be stimulating and rewarding from an educational point of view. All the conference hotels are located within only a few minutes walk of the conference venue in the centre of town. There will be plenty of opportunities for relaxation and networking with friends from across the globe amidst the gardens and greenery of Harrogate in bloom. Enjoy a sumptuous afternoon tea in the internationally renowned Betty’s Café or a refreshing beer in a traditional English pub.

The social program will offer delegates and accompanying persons an opportunity to step inside the medieval city walls of York to visit one of the most historic cities in Europe. The magnificent Minster is the largest gothic cathedral in Northern Europe and York is steeped in history dating from Roman and Viking times. Other planned excursions include the Royal Horticultural Society’s beautiful gardens at Harlow Carr and Fountains Abbey – a World Heritage site.

We look forward to welcoming you all.

With best wishes

**Gianantonio Manzoni**

President, ESPU

# About Harrogate

Harrogate is a spa town in North Yorkshire, England. Historically in the West Riding of Yorkshire, the town is a tourist destination and its visitor attractions include its spa waters and RHS Harlow Carr gardens. Nearby is the Yorkshire Dales national park and the Nidderdale AONB. Harrogate grew out of two smaller settlements, High Harrogate and Low Harrogate, in the 17<sup>th</sup> century. Since 2013, polls have consistently voted the town as "the happiest place to live" in Britain. In 2013 Harrogate was declared to be the third most romantic destination in the world, beating off rivals including Paris, Rome and Vienna.

Harrogate spa water contains iron, sulphur and common salt. The town became known as 'The English Spa' in the Georgian Era, after its waters were discovered in the 16<sup>th</sup> century. In the 17<sup>th</sup> and 18<sup>th</sup> centuries its 'chalybeate' waters (containing iron) were a popular health treatment, and the influx of wealthy but sickly visitors contributed significantly to the wealth of the town.

Harrogate railway station and Harrogate bus station in the town centre provide transport connections. Leeds Bradford International Airport is 10 miles (16 km) south-west of Harrogate. The main roads through the town are the A61, connecting Harrogate to Leeds and Ripon, and the A59, connecting the town to York and Skipton. Harrogate is also connected to Wetherby and the A1, by the A661. The town of Harrogate had a population of 71,594; the urban area comprising Harrogate and nearby Knaresborough had a population of 85,128, while the figure for the much wider Borough of Harrogate, comprising Harrogate, Knaresborough, Ripon and a large rural area, was 151,339.

# Presentation Guidelines

**Everybody needs to start his or her presentation with disclosure slide(s), addressing all actual, potential or possible conflict of interests.**

## A) Case Reports Presentation (CP) and Nurses Oral Presentation (OP) Guidelines

The quality of the meeting is extremely dependent on how you present your work.

**The ESPU Scientific Committee would like to remind you of a few key points:**

- Keep your introduction short.
- Do not exceed the time limits:
  - **Case Report Presentation (CP) – Doctors meeting:** 2 minutes for your presentation and 2 minutes for the discussion.
  - **Oral (O) – Nurses meeting:** 6 minutes for your presentation and 4 minutes for the discussion.
- When you exceed this time limit you will be interrupted and asked to finish.
- Please note that only PowerPoint presentations are possible (there will be no slide projectors available).
- Do not use too many slides (max. 10 slides = 2 slides per minute)!
- Hand in your presentation at least 2 hours prior to the session at the Speakers' Service Centre.
- Familiarize yourself with the available equipment before your presentation starts!
- As in the previous years we will be very strict with the time of presentations (5 min for oral). Since we consider time for discussion as essential, you will be asked to conclude when your time is out.
- Abstracts will be presented in groups of 4–7, and then the discussion takes place with all the presenters at the podium.

## General Instructions Equipment Supplied

- Computer with PowerPoint for computerized slide presentation; no more than 10 slides are allowed.
- Laser pointer.
- Cordless tie microphone.

There will be no ordinary slide projectors just computerized slide presentation!

## Instructions

Date, time and place are listed on the enclosed letter. Please be present in the room 15 minutes prior to the start of the session. An abstract presenting author must attend the whole session in which he/she is scheduled.

## Guidelines on How to Prepare Powerpoint Slides

- PowerPoint versions accepted are from 2000 to 2016.
- Hand in your PowerPoint presentation on CD-ROM or preferably USB-Drive (USB-Stick) at least 2 hours prior to the start of the session at the Speakers' Service Centre.
- A technician will incorporate your presentation on the computer network that is used for the PowerPoint presentations in the different meeting rooms. A technician in the lecture room will start your presentation.
- Your presentation can be loaded on to the network without problems when it does not exceed 15 MB: larger files can cause problems!
- Accepted Fonts are the standard Windows fonts. If you use a non-standard (e.g. scientific symbols) font with your presentation, you should supply this non-standard font separately with your presentation. For a normal projection, the font size 24 is sufficient.
- Use computer resolution of 1920 × 1080 pixels (HD 1080i) if possible.
- Format your presentation in 16:9 ratio – adjust the 'Page Setup' menu – in PowerPoint 2007/2016, select the 16:9 slide preset, or in PowerPoint 2003 or earlier, enter a custom size of 27.9 cm by 15.7 cm (11 inches by 6.1875 inches). Please see more information here.
- Use embedded pictures, DO NOT use files linked to other files. Linked files will not show up in your presentation!

## Accepted Picture File Formats

- JPG
- GIF
- TIFF
- BMP
- PNG

## How to Determine the Legibility of the Text

For a 17-inch screen, stand 2 meters away. If you can see your presentation (slide + test) clearly (presentation 100 % image) there shouldn't be problems seeing this presentation in a lecture room.

If you use a font size of 24, your text is readable at the back of the room.

Example: On a screen of 3.00 × 2.00 m, you can read the 24-font size at a distance of 20 m. If you use a bolder text, the legibility will improve.

### **Don't forget!**

Always make sure you bring a back up of your presentation!

All presenters must register to the meeting.

## B) Posters with Presentation (PP) Guidelines

The quality of the meeting is extremely dependent on the way you present your work.

**The ESPU scientific Committee would like to remind you of a few key points:**

- Make your poster visually interesting, but not over-elaborate.
- Put your poster on the assigned poster board in the ESPU Poster Area during the entire congress.
- Stick to an easy to understand format: usually abstract methods, results and conclusions.
- In addition to the poster you are allowed to give a:
  - **PP – Doctors meeting:** 3 minutes oral presentation followed by 3 minutes of discussion.
  - **PP – Nurses meeting:** 3 minutes oral presentation followed by 2 minutes of discussion.

## General Instructions

### Short Explanation on Abstract Sessions

Abstract sessions are interactive sessions that consist of poster and oral presentations. A poster presenter must put his poster on the assigned poster board in the ESPU Poster Area during the entire congress. During the session a poster-presenter present his or her abstract in a 3-minutes oral presentation followed by 3 or 2 minutes of interactive discussion with the audience.

Please note that moderators will be very strict with the time of presentations (3 min for poster).

Since we consider time for discussion as essential, you will be asked to conclude when your time is out. Abstracts will be presented in groups of 4–7, and then the discussion takes place with the presenters at the podium.

### Equipment Supplied

- Pushpins are available; please leave the pushpins on the board.
- Computer with Power Point for computerized slide presentation, no more than 6 slides are allowed!
- Laser pointer.
- Cordless tie microphone.
- There will be no ordinary slide projectors just computerized slide presentation!

### Instructions for Your Poster
